Summary

Backend engineer with **4+ years of experience** building scalable systems in **fintech and startup environments**. Curious by nature, with a strong focus on backend architecture, compliance-driven workflows, and reliable financial systems.

Work Experience

SDE 2 - Refyne Nov 2023 - Current

- Owned the **Collections domain** for a complex B2B2C lending platform, redesigning repayment flows using suspense accounts to ensure deterministic fund allocation.
- Automated handling of unallocated funds (auto-retry and refunds), ensuring precise tracking of every penny and **reducing reconciliation time from 7 days to 2 hours**.
- Achieved **100% regulatory compliance** with **RBI Digital Lending Guidelines** by refactoring legacy KYC and agreements modules and architecting the **Digital Signature module** from scratch.
- Designed and shipped critical financial workflows including refunds, foreclosures, statements, and payment links, improving audit transparency and operational reliability through **SLA-bound banking integrations**.
- Mentored junior engineers and drove design reviews; recognized with the **Above and Beyond Award (FY 2024)** and **2nd place in the Refactor Premier League** for engineering excellence.

Founding Engineer - FastHR.ai Dec 2022 - Nov 2023

- Built the core hiring platform as a **Founding Engineer**, designing end-to-end hiring automation using microservices.
- Implemented **state-machine–driven workflows (XState)** to manage complex hiring pipelines and eliminate edge-case failures.
- Developed an **AI-powered assessment platform** to auto-rank resumes, screen candidates, and grade submissions based on job descriptions.
- Built a centralized **authentication and SSO service** to securely scale access across all microservices.
- Led and mentored backend engineers, establishing development processes to improve delivery speed and enable effective remote collaboration.

SDE - (Backend) - OnlineSales.ai Jun 2022 - Dec 2022

- Optimized and prioritized FeedSync pipelines for high-balance customers, improving **system throughput** and customer satisfaction.

SDE 1 - SmartServ Jan 2021 - Jun 2022

- Led end-to-end development of the **Fire Protection module**, enabling onboarding of customers from a new business vertical.
- Built an internal account management portal integrating Freshdesk to centralize customer data, track calls, and monitor **MRR, ARR, and renewals**, reducing document dependency and improving behavioral insights.

Education

2017 - 2021 Bachelors (Information Technology) at **College of Engineering, Pune** (GPA: 7.74/10)

Skills

Backend & Systems: Node.js , NestJS, TypeScript, Java, Python, Microservices, Event-driven systems
Fintech & Compliance: Collections, Reconciliation, Refunds, Foreclosures, KYC, RBI Digital Lending Guidelines
Data & Infrastructure: MongoDB, MySQL, AWS, SLA-bound integrations, Idempotency, Failure handling
Engineering Practices: Design Patterns, SOLID Principles, Clean Code, System design
